

Date of Revision: September 9, 2019

This Natural Health Product was approved by Health Canada, and the following information was prepared by the product manufacturer. More information supporting the safety, efficacy or quality of a medicinal ingredient or natural health product can be found in the [Natural Health Products Ingredients Database](#). CPhA assumes no responsibility for, or liability in connection with the use of this monograph.

Recommended Use or Purpose

Red Clover is used in Herbal Medicine to help relieve minor skin irritation, itching and rashes associated with conditions such as eczema and psoriasis

Risk Information

Cautions and Warnings

For external use only.

Avoid direct contact with eyes.

Consult a health care practitioner if you are pregnant or breast-feeding.

For use in men: Consult a health care practitioner prior to use due to possible estrogenic effect.

Consult a health care practitioner prior to use if you are taking thyroid hormone replacement therapy.

Consult a health care practitioner prior to use if you have a liver disorder.

Do not use if you currently have or previously had breast cancer or if you have a predisposition to breast cancer such as abnormal mammogram and/or biopsy, or a family member with a breast cancer.

Consult a health care practitioner prior to use if you have a personal history of hormonal or gynecological disease including ovarian cancer, endometriosis and/or uterine fibroids.

Before use, ensure that you are up-to-date on appointed clinical tests such as mammograms and endometrial ultrasounds/biopsies.

Discontinue use and consult a health care practitioner if you experience breast pain, discomfort, soreness and/or tenderness, abnormal uterine bleeding including spotting and/or recurrence of menstruation in postmenopausal women.

Consult a health care practitioner prior to use if you are taking hormone replacement therapy.

Contraindications

Do not use if you are allergic to plants of the *Asteraceae/Compositae*/Daisy family.

Keep out of reach of children.

Known Adverse Reactions

Hypersensitivity/allergy is known to occur, in which case discontinue use.

Interactions

There are no known interactions. For more information, consult your health-care professional.

Recommended Dose

Apply cream topically in the affected area one to three times daily.

Directions of Use

Apply cream in the affected area. Consult a health care practitioner for use beyond 7 days.

Overdosage

For management of a suspected drug overdose, contact your regional Poison Control Centre. See the *CPS* Directory section for a list of Poison Control Centres.

Storage, Stability and Disposal

Store at a cool and dry place 15°-30° degrees Celsius. Stable for two years when stored at room temperature.
